

# Black Gold C-1000 Housing

COMO's Black Gold is a bypass engine oil filter that removes water and particulate down to 1 micron. Running off existing oil pressure, the Black Gold draws a fraction of the total oil flow, filters it, and returns it to the oil pan. This kidney-loop setup allows for a low-flow, high-efficiency filtration that cannot be achieved by the full-flow filter alone.

**PRODUCT BENEFITS INCLUDE**

- Reduced engine wear
- Longer engine life
- Decreased oil consumption and exhaust smoke
- Reduced oil oxidation and acid buildup
- Extended oil drain intervals
- Higher engine reliability

**SPECIFICATIONS**

- One C-1000 chrome-plated or powder-coated depth-filter housing
- Mounting brackets for direct mount to vehicle or machine
- Maximum pressure rating of 80 PSI
- Dimensions: 12"W x 10"D x 25"H
- Overhead clearance for filter change: 20"
- Approximate weight: 26 lbs.

**ADDITIONAL INFORMATION**

- Custom installation required with hoses and plumbing sourced separately
- Filter change recommended on a semiannual or annual basis
- Water removal up to 1 gallon per filter
- Dirt holding capacity up to 20 lbs. per filter

Don't let water and fine particulate contamination shorten the life of your engine. Remove the contaminants your full-flow filter leaves behind with a COMO Black Gold Filter.
